-50 Yard Hole: #16  
-60 Yard Hole: #15  
-Belly Line Hole: #5

## IMPORTANT NOTE

**Practice and fine tune your range finder!**

Cut an arrow to length (28 inches for an upright, alert turkey) and place the cut arrow (upright) next to your target. At 20 yards, the arrow from top to bottom, will fill the 20 yard space on the range finder. Try this for the other yardages, and fine tune by moving the fiber optic pins to line up with the arrow at all yardages.
